# A I M Shihab Uddin Khan

## FRONT END WEB DEVELOPER

Gmail | GitHub | LinkedIn | Twitter | AngelList | Medium | Portfolio

## SUMMARY

I'm Rafio, a versatile full-stack developer with experience in data engineering. I bring a unique blend of skills, including problem-solving, data visualization, and effective communication. I am eager to join an innovative company like Apple, where I can contribute to cutting-edge projects and thrive in a collaborative environment.

## SKILLS

**Front-End**: JavaScript, React, Redux, HTML5, CSS3
**Tools & Methods**: Git, GitHub, Netlify, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools
**Professional**: Remote Pair-Programming, Teamwork, Mentoring

## EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS                                                                  Remote
**Full Stack Web Development Student & Mentor**                          March 2023 – Present
Mastered intermediate and advanced topics in full-stack development (including Rails, Git, and DS&A challenges) while building multiple full-stack projects both independently and via pair programming.

**Movie Monday**— Movie Monday is a dynamic web application designed for movie enthusiasts to explore, discover, and engage with the world of cinema.
- Built with: **API, JavaScript**

**Doctor Appointment App**— Introducing the Doctor Appointment App - Your easy healthcare scheduling solution. No more waiting or phone call hassles. Our user-friendly platform simplifies appointment booking. Real-time availability updates and reminders streamline management.
- Built with: **React, Rails on Ruby**

**Budget App** — Budget App is a mobile web application that gives users the power to manage their budget: users can have a list of expenses (e.g bed) associated with a broader category(Home) so that they can know how much they spent on what.
- Built with: **Rails, Ruby on Rails**

**Space Travel Hub** — Space Travelers' Hub is a corporation that offers services for commercial and scientific space flight has a web application called Space-Travelers-Hub. Users of the app will be able to reserve rockets and sign up for particular space missions.
- Built with: **JSX, React, Redux, API**

MICROVERSE                                                                                        Remote
**Mentor (Volunteer)**                                                           April 2023 – Present
- Mentored junior web developers, providing technical support through code reviews.
- Proposed improvements to code organization to improve code quality and overall performance.

## EDUCATION

MICROVERSE                                                                  March 2023 – Present
**Remote Full Stack Web Development Program, Full Time**
- Spent 1800+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard gitflow, and daily standups to communicate and collaborate with international remote developers.

Ahsanullah University of Science & Technology
**Electrical & Electronic Engineering, Completed**                July 2018 – December 2022
- Research Topic: *Pneumonia detection using Chest X-rays based on CNN*
